

CSE 556 Internetworking Fall Semester 2002

Quiz No. 4

November 20, 2002

Time Allowed: 5 Minutes

Name: _____

Total: 40 Points (10 Points each)

State whether the given statement is TRUE or FALSE

S. No.	Statement	Answer
1.	Dynamic routing is preferred in small internetworks with few or no alternative routes.	
2.	Routers running Link State routing protocols periodically broadcast their entire routing table to their neighbors.	
3.	Novell's NLSP is a Link State routing protocol.	
4.	Switching using layer 2 identifiers is faster than routing using layer 3 addresses.
